INFORMATION

Languages: C++ (3 years), C# (3 years), Python (2 years), Java (1 year), Dart (2 year), TypeScript (1 year)

Technologies: React, Flutter, Firebase, Azure Services, Unity, Godot, MySQL

Skills: Agile, Scrum, AI, Game Dev, Hard Working, Problem Solving, Communication, Full Stack

Interests: Augmented Reality, Robotics, Game Development, AI

Aspirations: I am deeply interested in implementing innovative software/hardware solutions for augmented/virtual reality devices and robotic gadgets that can improve our daily lives.

EDUCATION

Seattle University *Sept. 2023 - Present (Dec. 2026)* 901 12th Ave, **Seattle, WA 98122**

Master of Science in Computer Science *Expected Graduation December 2026*

- Current GPA: 3.77
- Relevant Courses: AI, Adv ML, Robotics, LLMs, Software Architecture, Mobile Dev, ...

Bachelor of Science in Computer Science *Graduated December 2025*

- Magna Cum Laude
- 6x Quarterly Dean's List

PROFESSIONAL EXPERIENCE

IT Web Dev Intern *EKJ Rådgivende Ingeniører* *June - Sept. 2025* **Copenhagen, DK**

IT internship specializing in web development, maintenance of hardware, and researching AI solutions

- Developed an internal React web app integrating Microsoft APIs for streamlined internal processes
- Maintained and updated company computers, docking stations, and monitors
- Researched and prototyped AI-driven solutions using Azure AI Studio to improve business workflows

Student Grader *Seattle University* *March - June. 2025* **Seattle, USA**

Student Grader for an object oriented programming course at Seattle University

- Graded students homework and provided feedback on points the student missed
- Communicated with the professor of the course about updating rubrics and progress reports

CAPSTONE PROJECT

Mobile Dev Ops *Our Fabric Stash* *Sept 2024 - June 2025* **Seattle, WA**

Senior Capstone Project - Developed a mobile app for a local company from scratch with three groupmates

- Led full-stack development, designing and implementing the majority of the app's codebase
- Collaborated with teammates using Agile standups and Scrum boards to plan and track progress
- Worked closely with the project sponsor to ensure the final product met all client goals and expectations
